## LIVE YOURS

No matter what your budget, we have a bow you'll love. It's that simple. That's been the driving philosophy behind the Quest line from G5 Outdoors since we manufactured our first bow back on Day One. Every Quest bow is designed for performance and dependability in the field. Quest bows are built to last. If you are looking for your next hunting partner with more all around, think Quest. Live yours.

# 2016 LINE UP

**THE  
REVOLUTION  
IS HERE**

**STRONGER  
IS BETTER**

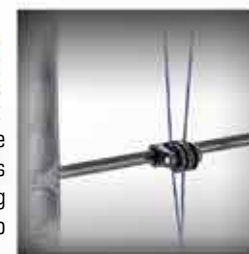

**STABILITE  
RISER**

Strength: high.  
Weight: low.  
Balance: equal.  
What else do you want  
in a riser? Nothing.

**ROLLER  
SLIDE**

Performance and speed restrictions are  
for slow pokes. The Quest Roller slide is  
designed with the least amount of drag  
and friction on the cables of the bows so  
you can open it up.

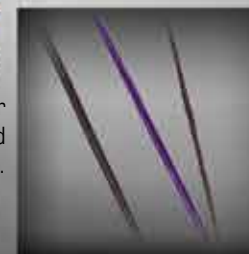

**DURAFUSE  
FINISH**

Others dream. We do.  
Our patented Durafuse Finish process utilizes  
sublimation instead of water transfer which  
makes for a product that's as durable as it is  
good looking.

**452X BCY  
STRINGS**

Strings are made from material that is stronger  
and more reliable for tougher, more efficient, and  
faster bowstrings.

**R.A.D. CAM**

You don't need to sacrifice comfort for  
performance. The R.A.D. Hybrid Cam  
breathes and a slow, smooth draw cycle.  
Add a rock solid wall to hold against and  
you're ready to hunt.

**FLUID CAM**

Fluid is the feeling when you draw it back.  
The Fluid cam gives you dependable  
speed that's easy on you. Whether your  
in the back yard practicing or at full-draw  
during late season, the Fluid cam will be  
easy on you and hard on the target.

**FLUID S.D. CAM**

Shorter draw shooters fight for every  
ounce of speed. The Fluid SD (short draw)  
single cam maximizes speed and maintains  
a smooth feel for people with a shorter  
draw length.

**QUEST**

**AMP**

Thanks to its all new Stabilite Riser, the Quest Amp is completely inclusive and has the greatest draw weight range available without any loss in efficiency. With Rotation Adjusting Draw-length (RAD) Cams, you can fine tune your draw length without a bow press. All of which gives you a lightning-fast bow with plenty of control, superior amounts of performance, and blazing speed. Go ahead, get amped.

**SPEED**

**DRAW** WEIGHT  
40-70 LBS

**FORGE**

An all new Stabilite riser adds strength to the Quest Forge, while the draw weight range of the limbs guarantees a comfortable draw cycle. Plus, the Fluid cam ensures that the bow fits perfectly. Those are the kinds of features that make for true trust in the field. And along with quality and dependability, There's something else the Quest Forge has: your back.

**FORGE**

30-60 LBS

WEIGHT

**STORM**

Here's a bow that's as unique as the archer who uses it: The Quest Storm. A new Stabilite riser gives the Quest Storm a slimmer grip for better control. A Fluid SD cam features a smaller fit for better performance. And a lower draw weight range brings a more comfortable hold. Now, you can get more in a bow, so you can get more out of it—no matter what kind of archer you are.

**STORM**

# RADICAL

The Quest Radical bridges the gap between child and adult archer by adjusting down to the draw length and weight of a young shooter. As your archer grows, the Quest Radical adjusts all the way up to adult size and can be changed without the need of a bow press. No more outgrowing bow packages; now there's one bow that can stick with your rising archer through every birthday.

**SPEED**  
295 FPS
