QUEST

LIVE YOURS

Since its creation, the Quest bow line from G5 Outdoors has maintained one very important philosophy: provide the very best bows for any budget. As Quest manufacturers, we understand how hard you work to find time for bowhunting; we work just as hard to bring you a bow that you can depend on for that week you do get out in the field, or those hunting weekends that seem few and far between. Every detail from axle to axle has been considered and designed to be as good—or better—than a higher-priced bow. Now you can spend less on your bow, and save more for living your Quest.

LINE UP

THE REVOLUTION IS HERE

R.A.D. CAM

The Rotation Adjustable Drawlength (RAD) Cams provide easy tuning of the bow for maximum comfort while still giving you the speed you need. Quickly rotate the module on each cam to increase or decrease the length of draw for a perfect fit.

FLUID CAM

The Fluid Cam is a keep it simple system: one wheel to keep the draw smooth; one cam to add speed; one module to adjust the draw to the right length.

QUEST

STRONGER IS BETTER

STABILITE **RISER**

The Stabilite riser is high in strength, low on weight, and equal in balance. It's everything you want a riser to be.

ROLLER **SLIDE**

The Quest Roller Slide is designed with the least amount of performance-robbing drag and speed-restricting friction on the cables of the bows.

AMP

When you hear your favorite song on the radio, you want to crank up the volume. Likewise, when you shoot your bow, you want to crank up the speed. The Quest Amp is long on performance with speed to match. With its all new Stabilite riser, the Quest Amp is completely inclusive and has the greatest draw weight range available without any loss in efficiency. Add the Rotation Adjusting Drawlength (RAD) cams, a system that can fine tune your draw length without a bow press, and you have a fast bow with plenty of control.

FORGE

"Old Reliable" is a name you give to the truck that keeps running long after its day; to the friend who has had your back since grade school, and to that hunting spot where you've always had success. Add the Quest Forge to that list. Built with the quality you need to withstand the elements, the Quest Forge is a bow you can rely on when you need it the most. The all new Stabilite riser gives the Quest Forge strength while the draw weight range of the limbs guarantees a comfortable draw cycle. Additionally, the Fluid cam ensures that the bow fits perfectly.

FORCE

QUEST

STORM

No two archers are the same; which is why one bow doesn't fit all. The Quest Storm is designed for archers who demand a bow that is not made for the masses. The Quest Storm features a new Stabilite riser with a slimmer grip for better control, a Fluid SD cam with a smaller fit for better performance, and a lower draw weight range for a more comfortable hold. The Quest Storm is made for those who demand more in a bow without having more of a bow.

STORM

RADICAL

Kids grow up fast—too fast for hard-working parents who see their kids outgrow bow packages before they're prepared to buy new ones. The Quest Radical ends that frustration and bridges the gap between child and a full-grown archer. The Quest Radical is an all-inclusive bow that adjusts down to the draw length and weight of a young archer, and then adjusts up to the size of an adult who can adjust it without the need of a bow press.
