BLACK

THRIVE ADVANCED TECHNOLOGY

The All New Thrive features an B2X aluminum riser that has a specific stiffness to weight ratio that is higher than any other aluminum in the industry.

The Flux cams have a buttery smooth draw cycle, yet still maintains its performance. This modular based cam comes with adjustable limb stops.

The Flexis AR is an adjustable flexing cable guard designed to reduce excess side load from the cables. The Flexis can be fine tuned to any arrow and fletching combination.
